TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, RDS, IAM, VPC, ELB, SQS, Autoscaling, Route53, Lambda, SNS, CloudWatch)
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Containerization:** Docker, Kubernetes
- **Infrastructure as code:** Terraform, CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch
- **ITSM Tools:** ServiceNow
- **Operating system:** Linux (RHEL)

KEY ACHIVEMENTS

- Reduced deployment time by 30% via CI/CD (Jenkins, GitHub)
- Improved MTTR by 30% through P1/P2 incident management
- Automated infrastructure using Terraform for consistent deployments
- Managed highly available Kubernetes clusters for scalability & uptime
- Implemented monitoring (Prometheus, Grafana, CloudWatch) to reduce issues

CERTIFICATION

- AWS solution architect associate

PROFESSIONAL SUMMARY

DevOps Engineer & Incident Manager with 5+ years of experience designing, automating, and managing scalable cloud infrastructure on AWS. Proven expertise in CI/CD automation, Kubernetes orchestration, and Infrastructure as Code (IaC). Strong track record of improving deployment efficiency, reducing downtime, and ensuring high availability of production systems. Experienced in handling critical incidents (P1/P2), improving MTTR, and driving operational excellence in production environments.

PROFESSIONAL EXPERIENCE

CAPGEMINI TECHNOLOGIES **OCT 2021 – PRESENT**

Senior Analyst – DevOps & Incident Manager

- Designed and implemented end-to-end CI/CD pipelines using Jenkins and GitHub, reducing deployment time by 30% and enabling faster release cycles
- Acted as Incident Manager, handling P1/P2 production incidents, reducing Mean Time to Resolution (MTTR) by 30%
- Managed Kubernetes clusters for containerized applications ensuring high availability and scalability
- Implemented Infrastructure as Code using Terraform, enabling automated and consistent environment provisioning
- Collaborated with cross-functional teams (development, QA, operations) to streamline release processes
- Automated manual operational tasks, improving efficiency and reducing human errors
- Monitored production systems using CloudWatch, Prometheus, and Grafana, ensuring proactive issue detection
- Enforced AWS security best practices using IAM roles, policies, and least privilege access
- Supported high-availability architecture with auto-scaling and load balancing strategies

RADICALS SOFTWARE **MAR 2020 – SEP 2021**

DevOps Engineer

- Designed and managed AWS infrastructure including EC2, VPC, RDS, S3, and ELB
- Developed Infrastructure as Code using Terraform and CloudFormation
- Containerized applications using Docker and orchestrated deployments on Kubernetes
- Built and maintained CI/CD pipelines using Jenkins and Git, improving release efficiency
- Automated deployments and configuration management using Ansible
- Monitored and maintained production systems ensuring high uptime and reliability
- Migrated on-premise applications to AWS cloud, improving scalability and performance
- Strengthened system security using IAM policies and access controls
- Troubleshoot production issues and provided L2/L3 support

PROJECTS

AXA Insurance Platform **Jan 2023- Present**

Role: DevOps Engineer & Incident Manager

- Managed large-scale insurance platform supporting policy and claims systems
- Ensured 99.9% uptime through proactive monitoring and incident management
- Handled critical production incidents and improved MTTR significantly
- Implemented CI/CD pipelines and automated deployments
- Maintained scalable and fault-tolerant AWS infrastructure

EDUCATION

• Bachelor of Technology (Mechanical Engineering)
Maharashtra Institute of Technology, Aurangabad |2020
CGPA: 7.5/10

•HSC | 2014
MAHARASHTRA, MARATHI
MARKS-

• SSC | 2011
MAHARASHTRA, MARATHI
MARKS - 79.9%

LANGUAGES

• English
• Hindi
• Marathi

Synchrony Bank – Digital Consumer Finance Platform **Nov 2021- Dec 2022**
Role: DevOps Engineer

• Supported digital banking platform serving millions of users
• Managed CI/CD pipelines and cloud infrastructure on AWS
• Ensured high availability, reliability, and secure transactions
• Worked on performance optimization and system stability

Rakuten Rewards (Ebates) – Cashback Platform **Oct 2020- Sep 2021**
Role: DevOps Engineer

•Managed high-traffic affiliate-based e-commerce platform
• Built scalable infrastructure for real-time transaction tracking
• Improved deployment processes and system performance
• Ensured reliability and fault tolerance under heavy load

Sainsbury – Retail E-commerce Platform **Mar 2020- Sep 2020**
Role: DevOps Engineer

• Migrated on-premise applications to AWS cloud
• Implemented DevOps practices for automated deployments
• Built scalable and cost-efficient infrastructure
• Improved system availability and performance
