PROFESSIONAL SUMMARY

DevOps Engineer & Incident Manager with 5+ years of experience designing, automating, and managing scalable cloud infrastructure on AWS. Proven expertise in CI/CD automation, Kubernetes orchestration, and Infrastructure as Code (IaC). Strong track record of improving deployment efficiency, reducing downtime, and ensuring high availability of production systems. Experienced in handling critical incidents (P1/P2), improving MTTR, and driving operational excellence in production environments.

KEY SKILLS

- **Cloud Platforms:** AWS (EC2, S3, RDS, IAM ELB, SQS, Autoscaling, Route53, Lambda, CloudWatch)
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Containerization:** Docker, Kubernetes
- **Infrastructure as code:** Terraform, CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch
- **ITSM Tools:** ServiceNow
- **Operating system:** Linux (RHEL)
- GenAI & Agentic AI

EXPERIENCE

1. Capgemini Technology Services, Bangalore *Oct 2021 – Present*

Designation – *Senior Analyst – DevOps & Incident Manager*

- Designed and implemented end-to-end CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 30% and accelerating release cycles
- Led P1/P2 incident management and war room calls leveraging ServiceNow and cross-functional coordination, reducing MTTR by 30% and minimizing business downtime
- Implemented Blue-Green deployment strategy on Kubernetes, enabling zero-downtime production releases and faster rollback
- Automated infrastructure provisioning using Terraform and Infrastructure as Code principles, enabling consistent deployments and eliminating manual errors
- Streamlined release processes across development, QA, and operations teams using DevOps best practices, improving delivery efficiency and collaboration
- Automated repetitive operational tasks using scripting and CI/CD tools, increasing team productivity and reducing human errors
- Implemented proactive monitoring and alerting using CloudWatch, Prometheus, and Grafana, enabling early issue detection and reducing production incidents
- Strengthened cloud security posture using IAM roles, policies, and least privilege access, ensuring compliance and secure system access
- Designed highly available architecture using auto-scaling groups and load balancers, improving system uptime and fault tolerance

2. Radicals Software, Pune *Mar 2020 – Sep 2021*

Designation – *DevOps Engineer*

- Designed and managed AWS cloud infrastructure using EC2, VPC, RDS, S3, and ELB, improving scalability and system performance
- Built Infrastructure as Code solutions using Terraform and CloudFormation, enabling automated and repeatable environment provisioning
- Containerized applications and managed deployments using Docker and Kubernetes, improving deployment consistency and scalability
- Developed and maintained CI/CD pipelines using Jenkins and Git, increasing release efficiency and reducing manual intervention

- Automated configuration management and deployments using Ansible, reducing configuration drift and improving system reliability
- Monitored production systems and ensured uptime using monitoring tools and alerting systems, maintaining high availability and performance
- Migrated on-premise applications to AWS cloud using cloud migration strategies, improving scalability, performance, and cost efficiency
- Enhanced system security using IAM policies and access controls, ensuring secure and compliant cloud environments
- Resolved production issues and provided L2/L3 support using troubleshooting and debugging techniques, minimizing downtime and ensuring business continuity

PROJECTS

1. AXA Insurance Platform *Jan 2023- Present*

Designation –*DevOps & Incident Manager*

- Managed large-scale insurance platform supporting policy and claims systems Ensured 99.9% uptime through proactive monitoring and incident management
- Handled critical production incidents and improved MTTR significantly
- Implemented CI/CD pipelines and automated deployments
- Maintained scalable and fault-tolerant AWS infrastructure

2. Synchrony Bank – Digital Consumer Finance Platform *Nov 2021- Dec 2022*

Designation – *DevOps Engineer*

- Supported digital banking platform serving millions of users
- Managed CI/CD pipelines and cloud infrastructure on AWS
- Ensured high availability, reliability, and secure transactions
- Worked on performance optimization and system stability

3. Rakuten Rewards (Ebates) – Cashback Platform *Oct 2020- Sep 2021*

Designation – *DevOps Engineer*

- Managed high-traffic affiliate-based e-commerce platform
- Built scalable infrastructure for real-time transaction tracking
- Improved deployment processes and system performance
- Ensured reliability and fault tolerance under heavy load

4. Sainsbury – Retail E-commerce Platform *Mar 2020- Sep 2020*

Designation – *DevOps Engineer*

- Migrated on-premise applications to AWS cloud
- Implemented DevOps practices for automated deployments
- Built scalable and cost-efficient infrastructure
- Improved system availability and performance

EDUCATION

- Maharashtra Institute of Technology, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad
  Bachelor of Technology (B.Tech) *2020*
- **H.S.C** *2014*
- **S.S.C** *2011*

CERTIFICATIONS

- AWS Solution Architect-Associate

LANGUAGES

- English
- Hindi
- Marathi
